Definitions & Caveats

NA-Not Available

NC—Not Calculated

a. Graduation rate: The Ohio Department of Education defines the graduation rate as the percent of students who entered high school who received a regular diploma or honors diploma during the reporting year, including students who graduated the summer after the 12th grade, and students who completed the course work and came back to finish the proficiency test and passed.

a. A student who takes more than 4 years to graduate does not have a negative impact on a district's graduation rate, because that student would be counted with the next class. The graduation rate is affected when a student either graduates or drops out. A student is counted as a graduate in the year that he or she achieves a high school diploma.

a. The GED (General Educational Development) Test provides many Ohioans who did not finish high school an opportunity to earn an Ohio High School Equivalence Diploma. Like a regular high school diploma, the GED diploma enables the diploma holder the opportunity to obtain employment, to apply for career advancement, to pursue higher education goals, or to reach a personal goal.

a, b. To meet the federal AYP (Adequate Yearly Progress) requirements, all student groups (all races, low income, students with disabilities) must be at or above the annual goals or make improvement over last year. Graduation and attendance goals must be met for the "all students" group.

a. In order to take the Ohio GED, an applicant must be at least 19 years of age, unless the applicant is between the age of 16-18 and qualifies for one of the age exceptions listed in the Ohio Administrative Code (OAC) §3301-41-01.

b. Attendance Rate: The ratio of the number of enrolled students actually in attendance during the course of a school year to the number of enrolled students that school year. This number is expressed as a percentage.

c. Proficiency test results-Percentage of students who scored proficient or better by test grade and subject, based on the rules currently in effect.

c. Grade 10 proficiency results are for 10th-grade students who took the test as 8th, 9th, and 10th graders in the 2003-2004 school year. For other years, results for 10th-grade students who took the test as 9th and 10th graders.

Definitions & Caveats

NA—Not Available

a. Offenses of violence defined in R.C. 2901.01

b. Fighting/violence data refers to occurrences that got coded #3 as per EMIS documentation 2001, 2002, 2003, 2004.

b. Discipline data for Springfield do not include Elmwood Center

b. Rate per 100 students: The number of disciplinary actions divided by enrollment, multiplied by 100.

c. Offenses against the family and children: Unlawful nonviolent acts by a family member (or legal guardian) that threaten the physical, mental, or economic well-being or morals of another family member and that are not classifiable as other offenses, such as Assault or Sex Offenses. Attempts are included.

d. Child abuse/neglect can include (1) physical abuse—a child with bruises, marks or injuries inflicted by other than accidental means; (2) sexual abuse—any sexual activity between a child and adult; (3) emotional abuse—a child who is belittled, ignored or subject to mental or psychological maltreatment; (4) neglect—a parent or caregiver fails to act on behalf of a child to provide adequate food, shelter, clothing, medical care, supervision or education; or (5) dependent child—a child who is homeless, destitute or without adequate parental care and support through no fault of the parent or caregiver, or a child who lives in a home in which another child is abused, neglected or dependent.

d. Substantiated report of child abuse/neglect: Report finds an admission of child abuse or neglect by the person responsible, an adjudication of child abuse or neglect, other forms of confirmation deemed valid by the Public Children Services Agency, or professional judgment that the child has been abused or neglected.

d. Indicated report of child abuse/neglect: Report finds that there are circumstantial, medical, or other isolated indicators of child abuse or neglect, but confirmation is lacking.

Definitions & Caveats

NA-Not Available

a. Chronic truancy enacted 2000, R.C.2152.02(F)(5), Ohio Revised Code

a. Adjudication: A decision by the judge or magistrate that a child has committed a delinquency act(s). A finding of guilt.

a. The Ohio Revised Code defines a "delinquent child" as any child who (1) violates any law that would be a crime if committed by an adult, except if the child is a juvenile traffic offender, (2) violates any lawful order of a court, (3) purchases or attempts to purchase a firearm illegally, (4) illegally obtains or attempts to obtain a tattooing service, body piercing service, or ear piercing service under certain prohibited conditions, or (5) is an "habitual truant" and who previously has been adjudicated an unruly child for being an habitual truant, and any child who is a "chronic truant."

a. The Ohio Revised Code defines an "unruly child" as any child who (1) does not subject the child's self to the reasonable control of the child's parents, teachers, guardian, or custodian, by reason of being wayward or habitually disobedient; (2) is persistently truant from home or school; (3) so deports the child's self as to injure or endanger the child's own health or morals or the health or morals of others; (4) attempts to enter the marriage relation without legal authority; (5) is found in a disreputable place, visits or patronizes a place prohibited by law, or associates with vagrant, vicious, criminal, notorious, or immoral persons; (6) engages in an occupation prohibited by law or is in a situation dangerous to life or limb or injurious to the child's own health or morals or to the health or morals of others; (7) violates a law, other than the law against the purchase or attempt to purchase a firearm that is applicable only to a child; or (8) is an "habitual truant" from school and who previously has not been adjudicated an unruly child for being an habitual truant.

Definitions & Caveats

NA-Not Available

b. Data do not include youth placed at Clark County Children's Home. The Youth Risk Behavior Surveillance System (YRBSS) was developed in 1990 to monitor high-priority health risk behaviors that contribute markedly to the leading causes of death, disability, and social problems among youth and adults in the United States. The YRBSS includes national, state, and local school-based surveys of representative samples of 9th- through 12th-grade students.

c. Current users includes all students who used a particular substance one or more times during the past 30 days.

c. Episodic heavy drinking refers to 5 or more drinks in a row within a couple of hours, one or more times in the past 30 days.

Definitions & Caveats

NA-Not Available

b. The syphilis data refer to primary and secondary syphilis, often referred to collectively as infectious syphilis. These two stages represent the period when the disease can be transmitted from infected individuals to their sex or needle-sharing partners.

c. The Youth Risk Behavior Surveillance System (YRBSS) was developed in 1990 to monitor priority health risk behaviors that contribute markedly to the leading causes of death, disability, and social problems among youth and adults in the United States. The YRBSS includes national, state, and local school-based surveys of representative samples of 9th-through 12th-grade students.

c. "Currently sexually active" refers to those students who had sexual intercourse with one or more people in the past 3 months.

b. Poverty rate: The Census Bureau uses a set of money income thresholds that vary by family size and composition to determine who is poor. Poverty rate is the percent of all persons/families for whom poverty status is determined with incomes less than the poverty thresholds. Poverty status is not determined for select population groups, such as those in group quarters.

c. Immunization refers to 4:3:1:3:3 series combination = 4 doses DTP or DTaP, 3 doses Polio, 1 dose MMR, 3 doses Hib, and 3 doses Hepatitis B vaccine.

d. Help Me Grow is a program that provides prenatal services and newborn home visits along with information about child development. The program provides service coordination and ongoing specialized services to eligible families with small children. Help Me Grow also provides services to children with disabilities from birth through age 3. This part of the program ensures that children with developmental delays and disabilities have access to and receive needed intervention services. Definitions & Caveats

NA-Not Available

b. Child abuse/neglect can include (1) physical abuse—a child with bruises, marks or injuries inflicted by other than accidental means; (2) sexual abuse—any sexual activity between a child and adult; (3) emotional abuse—a child who is belittled, ignored, or subject to mental or psychological maltreatment; (4) neglect—a parent or caregiver fails to act on behalf of a child to provide adequate food, shelter, clothing, medical care, supervision, or education; or (5) dependent child—a child who is homeless, destitute, or without adequate parental care and support through no fault of the parent or caregiver, or a child who lives in a home in which another child is abused, neglected, or dependent.

b. Substantiated report of child abuse/neglect: Report finds an admission of child abuse or neglect by the person responsible, an adjudication of child abuse or neglect, other forms of confirmation deemed valid by the Public Children Services Agency, or professional judgment that the child has been abused or neglected.

b. Indicated report of child abuse/neglect: Report finds that there are circumstantial, medical or other isolated indicators of child abuse or neglect, but confirmation is lacking.

c. Offenses against the family and children: Unlawful nonviolent acts by a family member (or legal guardian) that threaten the physical, mental, or economic well-being or morals of another family member and that are not classifiable as other offenses, such as Assault or Sex Offenses. Attempts are included.

d. The number of children screened and determined to have elevated blood lead levels

	Definitions &	
	Caveats	
NA Not Available		

b. National Association for the Education of Young Children (NAEYC) has a voluntary accreditation program for child care centers that wish to meet quality standards that go above and beyond basic licensing requirements. Ohio has 182 accredited child care centers.

b. Formal care refers to licensed, certified, or registered programs. Ohio does not require licensing or registration of small family child care homes.

b. Children under 6 data from Census 2000, child care capacity from Chilid Care & Elder Resource and Referral database

b. Centers—seven or more children of any age. Centers must be licensed. The Ohio Department of Job and Family Services licenses over 3,500 child care centers, which care for over 215,000 children each day.

b. Type A Homes—7-12 children (or 4-12 children if 4 children are under 2 years of age) cared for in the provider's personal residence. The provider's own children under 6 years of age must be included in the total count. Type A homes must be licensed. Sixty type A family day care homes are licensed by the Department of Job and Family Services.

b. Type B Homes—one to six children cared for in the provider's personal residence. No more than three children may be under 2 years of age. The provider's own children under 6 years of age must be included in the total count. Anyone can operate a Type B Home without a license. However, care for more than six children requires a license. Type B homes must be certified by the county department of Job and Family Services if the child care is paid for with public funds. Approximately 7,000 type B homes are certified by local departments of Job and Family Services.

b. Schoolage centers—seven or more children aged kindergarten and above. Schoolage centers must be licensed; 435 schoolage centers are licensed by the Department of Job and Family Services.

c. The state data on subsidized child care are for the month of January of a particular year; The county data on subsidized child care are a snapshot as of 1/10/2005.

d. All available slots are filled.

d. Eligible refers to all children below 185% of poverty.

NA—Not Available	

a. "Current smokers" refers to those who had ever smoked 100 cigarettes in their lifetime and reported smoking every day or some days. a. Clark County estimates are based on a regional estimate for Southwest Ohio.

a. The YRBSS was developed in 1990 to monitor high-priority health risk behaviors that contribute markedly to the leading causes of death, disability, and social problems among youth and adults in the United States. The YRBSS includes national, state, and local school-based surveys of representative samples of 9th- through 12th-grade students.

c. Obesity in children is defined as excess body fat in relation to lean body mass and is best measured by a term called body mass index (BMI). BMI is calculated by using a person's weight and height and gives an estimate of the amount of body fat. Since total body fat normally changes with a child's age, BMI is then compared with age- and sex-specific percentile standards based on large national surveys of children as old as age 20. Based on the current recommendations of experts, children with BMI values greater than the 85th percentile are considered at risk of becoming overweight; those children at or above the 95th percentile of the sex-specific BMI growth charts are considered overweight.

d. Total HIV diagnoses reflect all cases of HIV infection diagnosed for the first time including cases that are diagnosed with HIV and progressed to AIDS in the same year and cases concurrently diagnosed with HIV and AIDS.

d. HIV/AIDS data is based on county of residence at the time of diagnosis.

d. Living with HIV/AIDS rate is the number of persons living with HIV/AIDS per 100,000 population calculated using Census 2000 data.

NA—Not Available a. Age-adjusted death rate: A weighted average of age-specific death rates per 100,000 population. They are the average annual rates calculated over a 3-year period. The weight for each age category is the proportion of people in the age category in a standard population based on Census 2000.

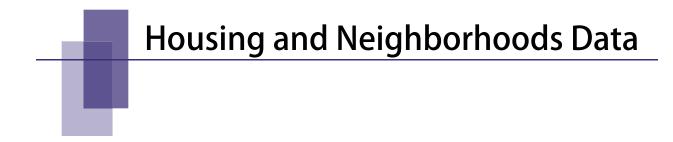

a. Chronic Lower Respiratory Disease was called Chronic Obstructive Pulmonary Disease or COPD prior to 1999.

City of Springfield Fair Housing, Peertrax: Home Mortgage Disclosure Act Data from Centrax

Definitions & Caveats

NA-Not Available

a. Filing rate is the number of households divided by the number of new foreclosures. In Clark County in 2003, one of every 60 households had the home foreclosed.

a. Sheriff sale rate is the number of households divided by the number of sheriff sales. In Clark County in 2003, one of every 95 households lost the home to the sheriff sale.

*These data are somewhat inconclusive because they do not separate prime and subprime loans in reporting. However, in looking at the mortgage companies, which are mostly subprime, it can be seen that they are taking a large and growing percentage of loans in the refinance area 30% in 2000 up to 36% in 2002. The refinance area is where predatory lending is most likely.
